FISCAL NOTE ANALYSIS

**STATE OF ALASKA
2022 LEGISLATIVE SESSION****Analysis**

The proposed legislation provides for a common property shellfish fishery classification in a special harvest area and specifies fishermen participating in this fishery would be subject to the payment of an assessment either on the projected value of the shellfish or on the pounds of shellfish harvested. Cost recovery, when implemented under the common property fishery, imposes an assessment on all commercial fishermen participating in the common property fishery.

The assessment is to be collected by the Department of Revenue (DOR) Tax Division and deposited into the general fund for appropriation back to the hatchery permit holder. DOR's revenue estimate is indeterminate; therefore, the appropriation to the hatchery permit holder is also indeterminate.

This appropriation will be reflected in the language section of the operating budget under the shared taxes section. The Salmon Enhancement Tax allocation was used for this fiscal note for informational purposes because the fiscal note system does not allow for the creation of new allocations. If enacted, this appropriation would be made in a new Shellfish Enhancement Tax appropriation.
